MARINE HEAVY HELICOPTER SQUADRON OF THE YEAR

For sustained superior performance while conducting operations from 1 January to 31 December 2020. While supporting its seventh, eighth, and ninth consecutive 31st Marine Expeditionary Unit detachments, HMH-463 "Pegasus" led the CH-53E fleet with over 2,800 mishap-free flight hours of superior assault support across the Pacific Theater, enabling the transportation of 3,465 passengers and 772,532 pounds of cargo. HMH-463 provided the highest readiness in the CH-53E fleet at 68% mission capable—with the lowest manpower due to persistent operational commitments. Pegasus reduced risk to aviation by increasing average piloting time from almost 10 to 19 flight hours per month. Pegasus actively advanced future concepts in support of the Marine Littoral Regiment by developing tactics, techniques, and procedures for the CH-53E community in the most challenging high-altitude, maritime, and littoral environments. By their distinguished performance and dedication to duty, the Marines of HMH-463 reflected credit upon themselves and upheld the highest traditions of the United States Marine Corps and the Unites States Naval Service.

HMH-463

MAG-24, 1ST MAW

KEITH B. MCCUTCHEON AWARD

Established in honor of General Keith B. McCutcheon, a pioneer helicopter pilot and a visionary in the development of Marine Corps aviation doctrine, for the most outstanding heavy helicopter squadron in Marine aviation.
